Subject: Temporary measure: limit dispensing of Berinert 1500 IU/ vial to HAE patients to one month at a time

Dear Blood Bank Director / Staff Member,

In recent months, CSL Behring Canada has observed significant demand spikes for Berinert 1500 IU / vial, with January 2019 exhibiting the highest demand per month ever. Adjustments to our production plan are currently underway; however, this will take several months of lead-time. In the interim and effective immediately, we ask for your collaboration to limit the dispensing of Berinert 1500 IU / vial to no more than one month at a time. Therefore, until further notice patients will need to renew their supply at their local blood bank on a monthly basis. This temporary measure is expected to ensure continuity of supply to all Canadian patients treated with Berinert.

CSL Behring Canada expect the situation to gradually return to normal in second half of 2019 and will inform you at that time. We would like to thank you in advance of your collaboration and apologize for any inconvenience to you and your patients.

For more information, please contact Customer Service at 1-866-773-7721 ext. 2386.

Sincerely,

Philippe Hébert
General Manager
