

Change of Manufacturing Site for Cytogam®

Dear Valued Customer,

Cytogam® manufacturing was transferred from CSL Behring AG to Kamada Limited in Beit Kama, Israel. Previously, Cytogam® ownership was transferred from Saol Therapeutics Research Limited to KI BioPharma LLC.

Cytogam® will continue to be made available for use through Canadian Blood Services and we will ensure that the usual supply chain to the patient is not interrupted in any way through this transition.

The DIN for Cytogam® will continue to be 02231962.

There has been no change to the product specifications.

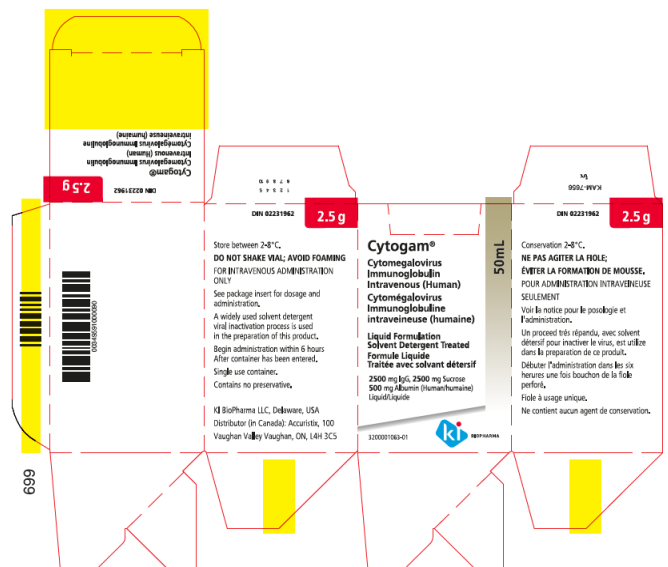

The label will be updated to show the change from Saol Therapeutics Limited as MA holder to KI Biopharma.

The new shipping carton holds 50 vials. There are 5 cases, each holding 10 unit boxes in every shipping carton. The dimension of the shipping carton are 12.7cm x 54cm x 28cm.
